Introduction

Ian and I absolutely love what we do. Our job of breeding bulls to efficiently produce the highest quality beef is our passion.

Good bulls come from naturally healthy and happy good cows. Our breeder herd is spread over 10 000 hectares in three different environments, with most of the bulls in this draft born and bred in our marginal ticky lantana infested Crows Nest forest country.

Tough environments need efficient adapted cattle and our cows are exactly that. They are moderate framed, fall pregnant young and at low weights and rebreed whilst lactating to wean a calf every year, are never treated for ticks or fly, walk long distances without panting and happily graze in +40c heat, grow quickly and fatten beautifully on grass or grain, are naturally docile despite being rarely handled, and remain sound in feet and teats to breed well into their second decade. We expect the same of our bulls and use them at 13mths-15mths old at

a 2% joining rate and down to less than 1% when they are two years old. Seifert Belmont Reds give more bang for your buck.

In short, they survive like Brahmans, marble like Angus and breed like rabbits.

With constant pressure on our industry to reduce carbon emissions, naturally adapted moderate highly productive and efficient cattle that produce more kg of high quality beef per hectare with the lowest input costs, is not only the most profitable business model, but is also the most environmentally sustainable into the future.

2019 marks our first solo Seifert Belmont Red sale. With drought prevailing, a few months ago we initiated a plan to conserve all remaining feed for the breeders and weaners and de-pastured most of our bulls to Rogers Creek feedlot where they 'feed bulls' in paddocks. The bulls went there in light condition but have grown well to be fit to work.

Ian's eye for cattle has led to a greater emphasis on phenotype to shape 'better looking' Belmont Reds. We've been told we've already significantly improved the Belmont Red's type in line with commercial cattlemen's expectations! At the same time, accelerating objective and measurable genetic progress remains our number one priority.

In combination, both genetically and phenotypically, we aim to produce bulls that meet our buyers' requirements. With 75 bulls on offer we are confident there will be a bull for every need and for every budget. There will be no reserve on any bull.

We are proud that our bulls are authentically commercially bred and commercially relevant across every trait of economic importance.

We hope you like them too and thank you sincerely for your support.

Jeanne and Ian

Sale Details

Welcome to our first Seifert Belmont Red Sale on property 'Wonga' 490 Jolimont Rd Jandowae Q 4410. Sale day is Monday the 22nd July 2019. The Helmsman Auction will commence at 11.00 am and close at approximately 1pm. It will be held concurrently on Auctions Plus and bidding online will be available from the Friday 19th July.

If you are unable to attend the sale and intend to bid online, please ensure you are registered to bid with Auctions plus prior to the sale.

If you wish to bid by phone, please arrange this prior to the sale by contacting Elders agent Robert Murray 0419644813 or your agent. There is mobile phone coverage at the auction site.

DIRECTIONS

There is a map on the 2nd last page of this catalogue

PRE-SALE INSPECTIONS

Bulls and heifers will be available for inspection any time by appointment on Saturday 20th and Sunday 21st July and from 7.30am on sale day 22nd July.

SAFETY RECOMMENDATIONS

We are confident all bulls offered for sale are of quiet and sound temperament. However, sale day brings different conditions and bulls are subjected to unusual levels of pressure. Even the quietest bull can be unpredictable. Visitors entering pens do so at their own risk and children are not allowed in pens. Our station hands Matthew and Graeme and the Elders agents will be on hand during the day to walk bulls up to the rails or around the pens as you wish.

HEALTH

All bulls have been vaccinated with 5in1, and for Vibriosis, Bovine Ephemeral fever (3-day sickness), and tick fever. 'Wonga' is tick free and all bulls are clear to go to tick free areas. Seifert Belmont Reds are JBAS 7 and WA eligible. All bulls have been DNA tested for sire verification and for polled/horned genes.

FERTILITY

All the bulls have passed a semen test, including semen morphology and motility by John Chapman of SEQ

genetics. Full details will be available in the supplementary sheet on the day.

RAW DATA

A supplementary sheet with raw data including recent weight, scrotal measurement, semen morphology and motility and ultrasound live carcase scanning will be available on the inspection days and on sale day.

IDENTIFICATION

All bulls have a yellow management tag with their breed register identification number, and an NLIS tag in their right ear. All bulls are branded with their year number and breed register identification number. Lot numbers and breed register numbers are noted in the sale catalogue and on the boards attached to the pen rails. The pens will be in lot number order with seven to ten bulls per pen.

PIC

Our PIC number is QDWB0155

INSURANCE

Ownership passes at the fall of the hammer. Insurance can be arranged on the day through Elders or your agent.

AGENT REBATE

A rebate of 4% is offered to outside agents introducing approved buyers in writing no later than 24 hours prior to the sale, and who accompany their buyer to the sale and settle on their behalf within 7 days of the sale. A 2% rebate is offered to all licensed agents introducing buyers in writing at least 24 hours prior to the sale.

REGISTRATION TRANSFERS

Upon the request of the purchaser, Seifert Belmont Reds is happy to transfer the registration of bulls, free of charge.

REFRESHMENTS/LUNCH

Complimentary refreshments throughout the day followed by a BBQ lunch and beer, with Belmont Red x Angus beef from Signature Beef, will be available when the auction is completed.

TRANSPORT

We are pleased to offer free cartage north to Charters Tower, west to Roma and south to Casino and other stops along these routes. For other inquiries

about organising transport, please contact us prior to the sale for advice.

ACCOMMODATION

The town of Jandowae is a 20 minute drive from 'Wonga' and accommodation is available at AAOK Jandowae accommodation park 104 High St, Jandowae ph: 46685071; The Exchange hotel 41 High St, Jandowae ph 4668 5139; Jandowae hotel motel 32 High St, Jandowae 4668 5206.

There are many motels in Kingaroy, Dalby or Chinchilla which are all about a 1 hour drive from 'Wonga'. Camping is available on property with access to water, power, shower and toilet.

SEMEN INTEREST

Seifert Belmont Reds will retain a half interest in any semen sold from bulls in this sale. This is a revenue sharing opportunity for buyers and for us. We retain the right to access bulls at a mutually convenient time and place and at our cost. Owners have the right to use their half share in their own herds or revenue share with Seifert Belmont Reds in semen sold to other users.

GUARANTEE

We warrant that every bull is fertile and capable of natural service at the time of the sale and is guaranteed fertile for twelve months from sale day. If a bull should become infertile or breakdown to be unable to serve cows naturally within 12 months for reasons other than injury or misadventure, Seifert Belmont Reds will provide you with either a satisfactory replacement or a credit equal to the purchase price of the bull less salvage value.

Seifert Belmont Reds will require you to provide a veterinary report.

DISCLAIMER

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the Vendors nor the Selling Agents or representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Did you know that Seifert Belmont Reds have high marbling & well-muscled high yielding carcasses?

On occasion when we have had adequate numbers in the correct weight range and at the right time, we enter carcase competitions. We are chuffed that to date we have won or placed in classes in every steer competition we have ever entered.

It is widely acknowledged that Belmont Reds are highly fertile good carcase animals, however few producers know that in the CRC Meat quality trials, under both Northern Pasture and Feedlot conditions, Belmont Reds surpassed the Angus in marbling under northern pasture conditions; or that a 'Signature Beef' Angus x Belmont Red composite won silver at the World Steak Branded Beef Challenge (UK 2016) to beat a full blood Wagyu.

About fifteen years ago CRC analysis showed the likely returns from infusion of Brahmans into the northern herd were slowing. Results from the CRC's (and other) northern crossbreeding study suggested significant gains could be derived in the north from using Sanga infused tropically adapted composites such as the Belmont Red, designed to improve product quantity and quality, relative to the Brahman, without compromising adaptation to environmental stressors.

Hence, an economic evaluation was undertaken at herd and northern Australian industry level, to examine the effect of changing 25 % of the Brahman herd in northern Australia

over a 10-year period (i.e. by 2013) to a tropically adapted infused system.

Under a grain-finishing scenario, the Extra Gross Margin for the Tropically Adapted Composite relative to Brahman was conservatively estimated to be \$76 /AE due to increased fertility, earlier turn off, earlier finishing, increased growth rate and feed efficiency, and improved meat tenderness and marbling. Today the profit margin would be much higher.

Fig 12b: IMF %. Pasture North (CRC)

Fig 12c: IMF %. Feedlot North

c. Marbling (IMF %)

"CRC" Figs. 12 a,b,c show the Intra Muscular Fat percentage (IMF%) for breeds in three environments. Intra Muscular Fat % (IMF%) is an accurate measure of marbling. Under Northern Pasture and Feedlot conditions, Belmonts had the best marbling and surpassed even the Angus.

Seifert Belmont Reds have placed or won in every steer competition they have entered

2018 : 5th and 7th 8th 9th 10th - BEEF Australia ANZ domestic 'Pen of 3 steers'

2017 : 3rd - BEEF Australia ANZ domestic 'Pen of 3 steers'

2012 : 1st - Pacific Beef Carcase Comp (ABCAS-MSA & yield) 'Individual carcass'

2012 : 2nd - Pacific Beef Carcase Comp 'Pen of 4 trade steers'

A very nice soft homozygous poll (PP) grandson of "Teddy" with a distinctive birth mark and a great suite of figures. He has high growth EBVs and carcass weight above the top 25% plus favourable negative days to calving in the top 20% and rib rump and marbling all above the 20% putting him in the top 10%-15% for the domestic and export \$indexes. This fits with his daily weight gain of 2.47 kg per day in the first 50 days. To top it off he is out of one of our favourite cows who has weaned 9 calves in a row and is PTIC with her 10th.

One of Ian's favourites, this super quiet well-muscled stretchy carcass bull is an absolute topper for eye muscle area (EMA) and retail beef yield EBVs both being above the top 1%. He also boasts a scrotal EBV in the top 5% and good early growth near the top 10% for 200D. He is by outside sire COR150019.

A very quiet chunky early maturing homozygous poll (PP) bull, 180185 has excellent carcass traits with EMA in the top 10% and carcass weight and retail beef yield in the top 20%. He had daily weight gain of 2.20kg in the first 50 days and is out of a dam who has had 4 calves in a row and PTIC with her 5th.

This tidy dark red bull ticks all EBV boxes with 18/19 traits well above the 50%. He is a curve bender with low birth weight but high growth, huge scrotal and negative days to calving in the top 5% with above average carcase traits combine with high fats including marbling being 'off the scales' above the top percentile band. He is one of the youngest in the draft and is a grandson of "Teddy".

Purchaser _____ \$ _____

Did you know that fertility is the biggest profit driver ?

Our job is to not only produce great tasting tender beef but also lots of it.

We use the 'days to calving' EBV to select the most profitable cows which fall pregnant early every year.

The EBV graph below shows one of our favourite cows which is in the top 1% for days to calving. She is also pregnant with her 9th calf in a row. She has survived and bred her whole life in our Crows Nest country which is decomposed granite, unimproved spear grass and iron bark phosphorous deficient, marginal forest country, with no assistance other than urea loose mix in winter. The *CASHCOW project identified that our Crows Nest country only had adequate protein and energy for 12 weeks of the year.

Other important fertility traits including Scrotal Size and Rib Fat EBVs in this super-duper cow are also in the top 1%-5%.

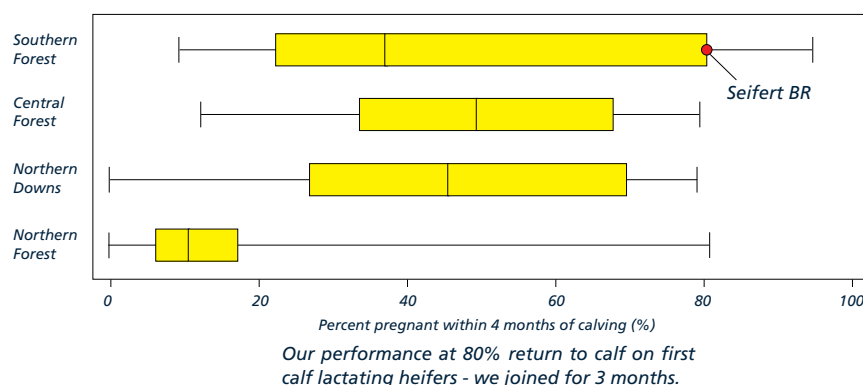

Not surprisingly she is at the absolute highest \$value for the domestic index (\$42 versus ave \$20) and export index (\$54 versus ave \$23).

We also select our bulls using days to calving and scrotal size EBVs, and semen test them as yearlings at 11-14mths old for %normal morphology and %normal motility, which means their daughters will reach puberty earlier, and have less lactation anoestrus.

Our females and bulls must be doing a good job, because when we were in the * CASHCOW research project we learnt that our lactating first calf heifers return to calf rate 2009 was 45% better than the project median.

Put simplistically, that could equate to 450 more calves/ per year/ per 1000 cows!

(*CASHCOW is the largest research project to date looking at female fertility and included about 75000 females and 72 commercial producers in QLD NT and WA).

A tall and later maturing homozygous (PP) bull out of a bought commercial Belmont Red cow who had no EBVs means his EBVs are mainly being driven by his sire. His impressive daily weight gain of 2.43kg per day in the first 50 days suggests he will outperform his current EBVs. He has a favourable negative days to calving out of a dam who had 7 calves in a row.

A homozygous poll (PP) bull with muscle, depth and thickness. He is out of one of our best cows being her 8th calf in a row and she is PTIC with her 9th. His EBV for days to calving is as good as it can possibly get at -10.6 days putting him above the top 1% for this trait. He is a grandson of "Teddy" and is suitable for use over heifers due to his low birth weight. He has very positive fats and is near the top 10% on the domestic and export indexes.

Purchaser _____ \$ _____

Are you sick of treating for cattle ticks and fly?

Did you know we never treat for ticks or fly (unless we have to clear to clean country) which means our cattle maintain their natural inherent parasite resistance at very high levels.

Natural tick resistance is also the most ecologically sound and the most economical method (free!) available for tick control - no time and money

spent on wages for repeated musters to dip; no back rubbers, fly tags, injectables, or pour on's means we are not facilitating chemical resistance nor effecting dung beetle populations.

CSIRO tick resistance trials identified that the Belmont Reds tick resistance was 98% which means that only 2 of

100 seed ticks complete their lifecycle. By comparison the Shorthorn's resistance was 82% which means that 18 out of 100 seed ticks survive. The Belmont Red is therefore 9 times more tick resistant than the Shorthorn for instance. Tick resistance is highly heritable, and is a highly effective, natural and sustainable method of controlling ticks.

The Belmonts tick resistance of 98% (Fig. 13) means that only 2 of 100 seed ticks complete their lifecycle, while 82% resistance of the Shorthorn means that 18 out of 100 seed ticks survive. The Belmont is therefore 9 times more resistant than the Shorthorn. Using the Belmont is therefore an effective and sustainable method of controlling ticks.

A nice type, with strong fertility traits including days to calving in the top 10% and scrotal size in the top 30%. He also boasts solid carcass traits of positive fats and EMA in the top 20% to make him a well-balanced moderate sire. His dam has a faultless calving history having weaned 3 calves and is PTIC with her 4th.

A long and solid type he is one of the younger bulls in the cohort. He is out of one of the original Belmont cows we bought from CSIRO which weaned 7 calves in a row. An extremely low birth weight EBV and gestational length make 180737 a good choice to use over heifers. He also has scrotal size and rib fat EBVs above average which put him in the top 20% for the domestic index.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
(b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
(c) A buyer is bound by these terms and conditions by bidding at auction.
2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors, agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and contract permits, the vendor's agent.
(b) When used in these terms the expressions "companion animals" means all animals originating from a property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
3. The following applies in interpreting these terms and conditions:
(a) The following words have the following meanings:
Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;
Livestock means animals auctioned pursuant to these terms and conditions; and Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions
(i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
(ii) plus any GST added in accordance with clause 12.
(b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
7. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interests of the vendor and need not give reasons for doing so.
10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
(a) the purchaser's name; or
(b) the bid card number which identifies the purchaser; or
(c) the name of the person on whose behalf the successful bid was made; and
(d) the Property Identification Code (known as the "PIC") of destination.
12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
13. The vendor warrants that the:
(a) vendor has (or will have) the right to sell the livestock at the time of delivery; and
(b) buyer will obtain title on completion of the buyer's obligation under these terms and conditions.
14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in a written agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
(b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
(c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.
18. (a) Subject to this clause the sale is complete on the fall of the hammer.
(b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
(i) delivery is taken by a representative of the buyer;
(ii) departure of the animal from the purchaser's delivery pen; or
(iii) one hour after the last animal is:
a. in the case of pre-sale weighing, sold; or
b. in the case of post-sale weighing, weighed.
(c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
(d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.
(e) This sub-clause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, through delivery to and from the scales, to the buyer's delivery pen and on to the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This sub-clause does not apply if the agent makes an announcement to that effect prior to sale.
19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
(b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.
(c) Any statements made in the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be

- supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner the female was pregnant on that date.
- (d) For cattle, the agent undertakes to make every reasonable effort to ensure that any NUS cattle device number is transferred from the saleyard account to the purchaser's account on the NUS database no later than midnight on the day of the sale.
 - (e) Where livestock have a food safety or market eligibility status derived from the NVD and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue in conjunction with vendor branding and/or announce the status prior to the offering of those lots.
20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
(a) does not acquire title to the livestock;
(b) holds the livestock as bailee only for the vendor;
(c) must act in a fiduciary capacity in its relationship with the vendor;
(d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
(e) is responsible for the safety and well being of the livestock;
(f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
(g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
21. The buyer agrees that:
(a) clause 20 creates a registrable security interest under the personal Property Securities Act 2009 (PPSA);
(b) the buyer acknowledges the rights of the vendor (and/or the agent is clause 23 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
(c) the livestock are collateral for the purpose of the PPSA;
(d) to the extent permitted, the buyer waives any right the buyer has under the PPSA to receive notices;
(e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to these terms and conditions; and
(f) if payment is not made in accordance to clause 15, but delivery is made to, or possession obtained by, the buyer or its representative, interest may be charged at the rate usually charged by the agent for overdue accounts on any amounts which remain owing at any time.
22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
23. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.6 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- 23.4. Title to the livestock does not pass to the agent or a nominee of the agent unless the agent, by written notice to the vendor, notifies the vendor that it is to be transferred to the agent or a nominee of the agent.
- 23.5. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
(a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
(b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- 23.6. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- 23.7. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
(a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
(b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 23.8. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- 23.9. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
(a) by this clause 23, other than as it expressly provides; or
(b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- 23.10. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
(b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
(c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation to do so, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.
(b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and treat livestock in accordance with any other or additional requirements of animal welfare legislation specific to the State or States in which livestock are consigned, managed, received, transported and treated in the course of the auction process.

CHAPTER THREE -

VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are

slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

27. The warranty of a vendor is that livestock and their companion animals offered for sale at auctions:
(a) pass DAFF and other regulatory authority requirements and inspections at the time of slaughter; (DAFF refers to Federal Government Department of Agriculture, Fisheries and Forestry);
(b) are of merchantable quality;
(c) carry an NUS device in accordance with State law;
(d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in the National Vendor Declaration, the livestock will have those characteristics or will be fit for the particular purpose or market; and
(e) all information in any National Vendor Declaration provided by the vendor is true, complete and correct in all material respects.
28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
(a) the buyer will be entitled to delay payment for the price of all livestock in that lot; or
(b) the vendor has the option, at the vendor's cost, of collecting the companion animals and returning them to the vendor's property; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
(a) any error, by the auctioneer, of transcription of information from the National Vendor Declaration completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
(b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
(c) any failure by the auctioneer to disclose prior to bidding, and in the pre-sale catalogue, that the vendor has failed to provide a National Vendor Declaration that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by the relevant government department. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the certificate issued by the relevant government department, existed prior to the fall of the hammer.
35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
(a) a certificate is issued by the relevant government department which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
(b) the certificate is received by the selling agent either in its original form or by fax by 5:00pm on the 7th day after the fall of the hammer; and
(c) if the condemnation is due to chemical residue the certificate follows testing in a laboratory approved by the relevant government department which establishes maximum residue limits in excess of the Australian limit.
37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of the following:
(a) bruising,
(b) fever,
(c) partial condemnation, or
(d) emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY STATE LEGISLATION

NSW Legislation

Property Stock and Business Agents Act 2002 Warnings
Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:
(i) to abstain from bidding; or
(ii) to bid to a limited extent only; or
(iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmanian Legislation

The auctioneer must not appear to acknowledge a dummy bid. A buyer must not give, agree to give or offer a gift or other consideration to a person for abstaining from bidding and a person must not accept any gift or consideration for abstaining from bidding.

A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

Western Australian Legislation - Auction Sales Act 1973 s31 NOTICE

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

Notes

BBSE BULL BREEDING SOUNDNESS EVALUATION

Under the BBSE Bull Breeding Soundness Evaluation run by the ACV the following is stated.

Motility For Live Rate: *Fail under 30%*
 Pass is given for 30 to 59%
 Tick is 60% or higher

Morphology: *Fail under 50%*
 P level pass is 50 to 69%
 Tick for 70% and over

The standards for Crush-side Semen and Sperm Morphology

Crush-side Semen evaluation and laboratory evaluation of Sperm Morphology are strong indicators of whether a bull is fertile or sub-fertile. If a physically-normal bull is rated as having passed these evaluations, he is expected to be fertile, ie, if mated, he can impregnate (pregnant at day 42 of gestation) by natural service at least 60% and 90% of 50 normal, cycling, disease-free females within 3 and 9 weeks, respectively.

The ACV has 2 pass levels for semen evaluation.

The highest level -Tick - indicates that the bull is fertile with respect to the category assessed and has 60% or higher progressively forward motile sperm. Further, it is very likely that the semen of this bull will be fertile after freezing. The lower level - P - was introduced to indicate that a bull may be fertile under natural mating, but it is likely his semen is not suitable for freezing.

The P level is given to bulls with between 30 and 59% motile sperm in Crush-side Semen evaluation. Bulls have to pass thresholds for eight Sperm Morphology categories and 70% or higher normal sperm, as assessed by an accredited sperm morphologist, to gain a tick for this assessment category.

For a P-level pass, this includes having between 50% and 69% normal sperm.

It is possible that physically-normal, P-level bulls, and especially those close to the lower threshold, may be shown to be less than fully fertile when mated. Such bulls are acceptable under multiple-sire mating, but veterinary advice should be considered before single-sire mating of such bulls.
